

June 29, 1999

MEMORANDUM TO: William D. Travers  
Executive Director for Operations

FROM: Annette Vietti-Cook, Secretary /s/

SUBJECT: STAFF REQUIREMENTS - SECY-99-008 - RULEMAKING  
PLAN, "PHYSICAL SECURITY/ SAFEGUARDS FOR  
PERMANENTLY SHUTDOWN POWER REACTORS," FOR  
AMENDMENTS TO 10 CFR PART 73

The Commission has approved the rulemaking plan for physical security and safeguards requirements for permanently shutdown power reactors as outlined in option 3 of the attachment to the subject paper. Consistent with the Staff Requirements Memorandum -- Commission Briefing on Part 50 Decommissioning Issues (M990317C) on March 17, 1999, dated June 23, 1999, this rule should be considered in the context of the integrated, risk-informed decommissioning rulemaking initiative. Additionally, the staff should ensure that outstanding generic technical concerns (i.e., high burnup fuel, high density fuel storage configurations, etc.) are appropriately resolved and coordinated with the integrated review initiative.

(EDO)

(SECY Suspense:

7/30/99)

The staff, in considering the performance-based approach, should evaluate physical protection requirements (including for the vehicle barrier system) against the existing threat which should be periodically updated, or updated based on credible threat information.
