**SUSQUEHANNA STEAM ELECTRIC STATION
CORRECTION TO PLA-5175 (DATED 05/31/2000)
WHICH TRANSMITTED NRC REQUESTED
CLARIFICATIONS TO PPL GENERIC LETTER 96-05
MOV PROGRAM
PLA-5238**

**Docket Nos. 50-387
and 50-388**

This letter is being issued to provide a correction to PLA-5175 (dated 05/31/2000) that transmitted NRC requested clarifications to the PPL Generic Letter 96-05 MOV Program. This correction is a result of an administrative error. The following words were inadvertently omitted from the last paragraph on page 1 of PLA-5175:

“only minor deviations as discussed in Reference 1. Additional minor deviations were established during the development of interim static test frequencies as discussed below.”

Therefore, the last paragraph of the letter should read as follows:

“General Periodic Verification Strategy

PPL is an active participant in the development of the Joint Owners Group (JOG) Periodic Verification Program and is committed to implement the program as described within NEDC-32719, Revision 2, “BWR Owners’ Group on Periodic Verification” with only minor deviations as discussed in Reference 1. Additional minor deviations were established during the development of interim static test frequencies as discussed below.”

If you have any questions, please contact Mr. Cornelius T. Coddington at 610-774-4019.

Sincerely,

R. G. Byram
