

September 20, 2000

Mr. James McMahon  
Minority Leader - Oswego County Legislature  
3276 Fulton Avenue  
Central Square, NY 13036

Dear Mr. McMahon:

Attached is the information that Larry Doerflein, Harold Gray and I promised you during our telephone discussion on September 19, 2000, regarding NRC regulations governing aspects of the proposed Independent Spent Fuel Storage Installation (ISFSI) at the FitzPatrick Nuclear Plant. In addition, I also included several informational documents and brochures available from the NRC's Office of Public Affairs (OPA) to help explain this subject to you in more detail. If you wish to obtain further information on this topic, please visit the NRC's website at [www.nrc.gov](http://www.nrc.gov). Specifically, the website icon marked Radioactive Waste will provide you with the latest information on this topic; NRC Inspection Manual procedures 60851 - 60855 governing the NRC inspection of new ISFSIs are also available under the website icon marked Reference Library.

If we can be of any further assistance, please call either Harold Gray, Robert Bores or myself at the NRC Region I office at (610) 337-5000.

Sincerely,

**/RA/**

Richard S. Barkley, P.E.  
Senior Project Engineer  
Division of Reactor Projects
