Dear Nuclear Regulatory Commission:

I am a seriously concerned resident of Utah in opposition to the Goshute Skull Valley Nuclear Waste Storage Facility. I got involved in this with the realization that I need to participate along with our esteemed representatives to try and help prevent this from happening—or at the least to demand that the Nuclear Regulatory Commission extend the public comment period for a minimum of 6 months. There were many residents of Morgan—who really knew very little facts concerning this serious issue—and many others who feel like they can not make a difference. That is when I wrote this following letter to the editor, and it was published in both local newspapers. There were 215 residents mostly from Morgan who stopped by to sign petitions within the last 2 weeks...there are more who are still wanting to sign, but we are out of time. Enclosed is a copy of the signed petitions, and the letter to the editor.

Sincerely,

Carolyn Hemingway

Letter to the editor in Morgan, Utah-September 1, 2000

I don't like admitting to the whole community that sometimes I hide my head in the sand on important issues that hit my panic button. Quite some time ago--I partially heard something about Utah being considered for the site of the nations nuclear waste storage facility somewhere out by Tooele. I dismissed the idea thinking that we had enough potential problems just with the nerve gas facility in our back yards (with a moderate wind)...and tried to optimistically assume Utah would never let this happen. Part of having my head buried means that I do not read the big city newspapers, and only occasionally--half way listen to the news. It helps this ostrich to be more positive about things. Last week a fax came to the real estate office where I work as an assistant office manager--about the nuclear waste issue. It sounded to me as if Governor Levitt's efforts along with the Citizens Against Radioactive Waste In Utah (honorary board members like Governor Norman Bangertter, Mayer Ted Wilson, etc...) were at a dead end and about out of time. What really got my attention was when I read that about 92% of all the nations nuclear waste is generated east of the Colorado River, and that one of the main routes by rail would be right through our beautiful little valley on the way to the Goshute Indian Reservation. There are numerous things that come to mind instantly...most of us live maybe a quarter mile at most from those tracks—what about derailment, how safe, etc... The biggest thing that bothers me is that it seems like the people that generate nuclear waste should be responsible for storing it, or consider other means of energy. The Citizens Against Radioactive Waste In Utah were asking any concerned Utah Citizens to get a voice with them in opposition to this, or at least to have more time to evaluate this sensitive issue. If anyone would like to sign a petition to let these independent energy companies know we are not in favor of this, and that we would like more answers to their plans—please look for a petition during the next few weeks at

different locations. There will be a petition at Nebco for anyone doing business there or passing by, also in the lobby of the post office, and at times there will be a table set up at the Jubilee market or petitions left on the bulletin boards. All comments and petitions have to be received by September 21st , and hopefully we can help make a difference. Thank you to a great community.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)
