Subject: No nuclear waste dump in Utah PLEASE!

65 FR 39206
June 23, 2000
75

Please do not consider using Utah as a nuclear waste dumping grounds. Utah is one of the most beautiful states in the nation and yet has already been abused far too often by the DOD for nerve gas storage and disposal and other wasteful purposes. The people of Utah will vigorously fight any attempt to dump nuclear wastes in Utah anywhere. Please leave such wastes in the states that benefited economically from the generation of such wastes. That is only fair and appropriate.

Sincerely and thankfully,
Ray and Kathy Wenger, lifelong Utah residents who care.
