MEMORANDUM TO: L. Joseph Callan
Executive Director for Operations

FROM: John C. Hoyle, Secretary /s/

SUBJECT: STAFF REQUIREMENTS - SECY-97-029 - ABNORMAL
OCCURRENCE REPORTS: IMPLEMENTATION OF
SECTION 208 ENERGY REORGANIZATION ACT OF
1974; REVISION TO POLICY STATEMENT

The Commission has approved publication of the proposed Federal Register notice subject to the following comments.

1. The Federal Register notice should be revised to explain that these revisions to the fuel cycle facility abnormal occurrence (AO) criteria not only add facilities with NRC certification such as gaseous diffusion plants, but also clarify the AO criteria for all fuel cycle facilities, and why these latter changes were needed.
2. Item (3) on page 10 should be revised to read 'Major deficiencies in design, construction, use of, or management controls for facilities or radioactive material licensed by or otherwise regulated by the Commission.'
3. In addition to adding the new footnote on page 8, the subsequent footnotes on pages 13 and 17 should be renumbered.
