Country: us

Comments: I oppose the proposal to transport and store nuclear waste on the Skull Valley Goshute Reservation. Nuclear waste should be disposed of and cared for on-site and not transported across the country. This is an extremely dangerous action and I do not believe the current safeguards will effectively prevent accidents.

Utah and Nevada have already seen enough waste storage and nuclear testing that has killed people and tainted our environment. There are no amount of jobs that are worth dying for or resulting in a poisoned land.

Please reconsider this horrific mistake and prevent any more nuclear or chemical waste from being dumped in Utah.

Sincerely,

Rob Morrison
