

September 27, 2000

The Honorable Sue W. Kelly
U.S. House of Representatives
1122 Longworth House Office Building
Washington, D.C. 20515

Dear Congresswoman Kelly:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/

Peter W. Eselgroth, Chief
Projects Branch 2
Division of Reactor Projects

September 27, 2000

The Honorable Maurice D. Hinchey
U.S. House of Representatives
2431 Rayburn Building
Washington, D.C. 20515

Dear Congressman Hinchey:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/

Mr. Edward F. Jacoby, Jr., Director
New York State Emergency Management Office
Building 22, State Campus
Albany, New York 12226

Dear Mr. Jacoby:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/

September 27, 2000

Mr. Arne H. Norstom, Chair
Putnam County Legislature
40 Gleneida Avenue
Carmel, New York 10512

Dear Mr. Norstom:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/

The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/

Peter W. Eselgroth, Chief

Mr. Charles Donaldson, Esquire
Assistant Attorney General,
New York Department of Law
120 Broadway
New York, NY 10271

Dear Mr. Donaldson:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the Indian Point Nuclear Power Plant, which are in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, October 11, 2000, at the Cortlandt Town Hall, in Cortlandt Manor, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Indian Point Units 2 and 3. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5234. My e-mail address is pwe@nrc.gov.

Sincerely,

/RA/
