**Subject:** radioactive waste

SEP 27 9 14 AM '00

The US Nuclear Regulatory Commission is in the process of legalizing the "release" or "clearance" of radioactive materials from licensed, regulated control into raw materials, building supplies and items with which we come into daily contact. It is irretrievable and irreversible once these materials are turned loose. Our health system and Soc. Sec. Disability System can not accommodate such an onslaught as this will produce. Stop and think for Pete sake and stop this horror from happening. There must be an Executive Order prohibiting radioactive wastes and materials from entering the consumer marketplace, landfills, incinerators, anywhere but licensed radioactive facilities. Recapture those already released and stop this practice internationally. Shame on our profit motivated nuclear industry. Control them, do your jobs!!!
