Subject: First Reactors for Retrofit

Listed below are 14 power reactors that should be subject to the ADAMS Retrofit during the next 6 months. The day-to-day contact on these plants is the NRR section chief responsible for these, Marsha Gamberoni.

Three Mile Island 1
Beaver Valley 1 and 2
Calvert Cliffs 1 and 2
Indian Point 2
Indian Point 3
Susquehanna 1 and 2
Ginna
Fitzpatrick
Nine Mile Point 1 and 2
Oyster Creek

I will be monitoring your retrofit activities on a monthly basis to see how quickly the activities proceed and to check with the individual plant contacts to see how well they can use the documents being retrofitted. My first monitoring will occur at the end of this month. Every three months I expect to re-issue the list of reactors to be ADAMS retrofitted. This will continue until the funded effort - funded for two years of retrofitting of about 55 reactors - is completed.
