**SUBJECT: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Performance Indicator Evaluation Completion Schedule**

Reference: 1. NRC Letter to M. Colomb (NYPA), "Assessment Follow-Up – FitzPatrick" dated September 1, 2000.

Dear Sir:

The NRC requested in Reference 1 the completion date of NYPA's evaluation of performance issues associated with unplanned power changes that have resulted in FitzPatrick's quarterly Performance Indicator (PI) remaining in the WHITE band for the second and third quarters of 2000.

A "Common Cause Analysis of Equipment Performance Issues (1993 – 1999)" report was completed by the Authority in November, 1999. The report evaluated equipment related events, quantified their associated failure modes, and identified common causes and corrective actions. The Authority is presently updating this report to include the evaluation results of recent events which contributed to unplanned power changes.

Additionally, based on evaluations completed to date, inspections and corrective maintenance activities have been scheduled for the plant's upcoming refuel outage commencing October 6, 2000.

A001

Completion of this work, and update of the common cause analysis will be accomplished by December 31, 2000.

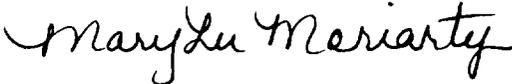

Attachment I is a summary of the commitments made by the Authority in this letter.

Very Truly yours,

Michael J. Colomb
