

October 11, 2000

Mr. H. A. Sepp, Manager  
Regulatory And Licensing Engineering  
Westinghouse Electric Company  
P.O. Box 355  
Pittsburgh, Pennsylvania 15230-0355

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC  
DISCLOSURE, WATTS BAR NUCLEAR PLANT, UNIT 1 (TAC NO. MA8636)

Dear Mr. Sepp:

By your application and affidavits dated March 22, 2000 (CAW-00-1393), you requested that certain information contained in the Tennessee Valley Authority's license amendment application dated April 10, 2000 (TS-99-013), Enclosure 4, WCAP-13084, "Tubesheet Region Tube Alternate Plugging (F\*) Criterion . . . ." be withheld from public disclosure pursuant to Title 10, *Code of Federal Regulation* (10 CFR) 2.790. A nonproprietary copy of this document (WCAP-13085) has been placed in the NRC public document room and added to the Agencywide Documents Access and Management Systems Publicly Available Records System (ADAMS PARS) Library.

The affidavit stated that the submitted information should be considered exempt from public disclosure for the following reasons:

- (4)(ii)(a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of Westinghouse's competitors without license from Westinghouse constitutes a competitive economic advantage over other companies.
- (4)(ii)(c) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.
- (4)(ii)(e) It reveals aspects of past, present, or future Westinghouse or customer funded development plans and programs of potential commercial value to Westinghouse.

H. A. Sepp

- 2 -

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the proprietary version of the submitted information contained in the Tennessee Valley Authority's application, dated April 10, 2000, Enclosure 4, WCAP-13084, "Tubesheet Region Tube Alternate Plugging (F\*) Criterion For The Tennessee Valley Authority Watts Bar Units 1 and 2 Nuclear Power Plant Steam Generators" will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

Sincerely,

*/RA/*

Robert E. Martin, Senior Project Manager, Section 2  
Project Directorate II  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation
