

**0 7 JUN**

Docket No. 40-08816

License No. **SUB-1416**

**MEMORANDUM FOR:** Ralph M. Wilde, Section Leader, Policy and Procedures  
Section IMOB, NMSS

**FROM:** John D. Kinneman, Chief  
Nuclear Materials Safety Section B, Region I

**SUBJECT:** EXPIRED LICENSE, ENGINEERING DYNAMICS CORPORATION,  
LOWELL, MASSACHUSETTS

On April 23, 1987, a licensee representative, Robert Carbone, Quality Control Manager, was contacted and informed that License No. SUB-1416 was expiring on May 31, 1987 and that no renewal application had been received. The licensee representative explained that they never received or possessed licensed material and the company was deciding whether to have the license terminated or not. On June 11, 1987, Mr. Carbone was contacted and informed that the license had expired and that no renewal application had been received. The licensee representative explained that he had just received our letter of inquiry and that it was the company's intent to terminate the license. Other attempts by this office to obtain a signed Certificate of Disposition of Materials were unsuccessful. On April 13, 1988, Steven Courtemanche of this office visited the site to determine if any licensed material remained at the site and to obtain a signed Certificate of Disposition. No licensed material was found on site during a tour of the facility. A Certificate of Disposition of Materials dated April 13, 1988 and signed by a company representative is enclosed.

Based on a review of the information supplied by the licensee, the observation during the tour and a review of the type and form of material authorized by the license, this license may be retired.

Based on the above information, we have retired License No. SUB-1416. Please remove it from your active shelves.

Sincerely,

**Original Signed BTt**
