Subject: Recycling Radioactive Waste

OCT 17 A7:13

October 16, 2000

Ladies and Gentlemen of the NRC,

I urge you to sponsor legislation that will:  
Keep radioactive wastes and materials from nuclear power and weapons isolated from the public and the environment;  
Prohibit any releases from regulatory control;  
Prohibit radioactive materials from entering the consumer marketplace or anywhere else except in licensed radioactive facilities;  
Recapture any and all radioactive materials that have already been released;  
Work for an international prohibition on radioactive release.  
Our lives, and the lives of our children and grandchildren, as well as the entire ecology are in jeopardy because of unwarranted releases. Thank you

Sincerely,  
Sister Marguerite E. Donovan, CSJ
