I. SECY-93-003 - Clarification of Physical Protection
Requirements at Fixed Sites

The Commission, by a 5-0 vote, approved final amendments to its physical protection requirements for fixed sites. The amendments make it clear that the Commission's regulations do not require protection against both radiological sabotage and the theft of special nuclear materials at all facilities. The amendment also adds a requirement for protection against radiological sabotage at nonpower reactors operating at or above 2 megawatts thermal power where deemed necessary.

The Federal Register Notice should be reviewed by the Regulatory Publications Branch, ADM, and forwarded for signature and publication in the Federal Register.
