Robert H. Leyse  
P.O. Box 2850  
Sun Valley, ID 83353

Dear Mr. Leyse:

In response to your e-mail to the Office of Public Affairs of August 19, 2000, our congzant staff member has reviewed the Penn State Rod Bundle Heat Transfer web site. He made several editing corrections, which have been sent to Penn State and implemented.

In response to your question 1, there have been only two versions of the report describing the work performed under tasks 1 to 10 of the contract: (1) the draft version which was completed and sent for peer review in October 1998; and (2) the final version which revised the draft according to the comments of the reviewers. We received the final version in February, 2000. Since that time we have been resolving formatting issues. This work is now complete.

Concerning the schedule of the program, some delays were encountered in the procurement of components from subcontractors. The test assembly is now assembled and in place, and the facility is nearing completion.

Sincerely,

**/RA/**

John H. Flack, Acting Chief  
Safety Margins and Systems Analysis Branch  
Division of Systems Analysis and Regulatory Effectiveness  
Office of Nuclear Regulatory Research
