The Commission has issued the enclosed Amendment No. 11 to Facility Operating License No. DPR-50 for the Three Mile Island Nuclear Station, Unit 1. This amendment consists of changes to the Technical Specifications in response to your request dated December 23, 1975.

The amendment incorporates into the Three Mile Island Nuclear Station Technical Specifications changes to the Administrative Controls. The technical specifications are based on the regulatory positions described in Regulatory Guides 1.8, "Personnel Selection and Training"; 1.16, "Reporting of Operating Information - Appendix A Technical Specifications," Revision 4; and 1.33, "Quality Assurance Program Requirements."

We request that you use the formats presented in the Appendices to Regulatory Guide 1.16, Revision 4, for reporting operating information and that you report events of the type described under the section "Events of Potential Public Interest." Instructions for using these reporting formats are contained in Regulatory Guide 1.16 (a copy is enclosed for your use), and AEC report OOE-SS-001 titled "Instructions for Preparation of Data Entry Sheets for Licensee Event Report (LER) File" (a copy of which was provided to you previously). This report is modified by updated instructions dated December 8, 1975 which are enclosed. Copy requirements are summarized in Regulatory Guide 10.1, "Compilation of Reporting Requirements for Persons Subject to NRC Regulations", a copy of which is also enclosed. This Guide will assist you in identifying reports that are required by the Commission's regulations set forth in Title 10 Code of Federal Regulations but are not contained in your technical specifications. Reports that are required by the regulations have not been repeated in your technical specifications.
