The Commission has issued the enclosed Amendment No. 17 to Facility Operating License No. DPR-50 for the Three Mile Island Nuclear Station, Unit No. 1 (TMI-1). The amendment consists of changes to the Technical Specifications in response to your applications dated August 8, 1975, as supported by filings dated July 9 and 15, 1975, and October 23, 1975; and January 13, 1975, as amended February 11, 1976, and April 2, 1976, and supported by filings dated January 23, 1976, April 5 and 8, 1976.

This amendment revises the Technical Specifications to establish operating limits for TMI-1 as reloaded for cycle 2 operation based upon an acceptable Emergency Core Cooling System evaluation model conforming to the requirements of 10 CFR 50.46, and terminates the operating restrictions imposed by the Commission's December 27, 1974 Order for Modification of License.

Copies of the Safety Evaluation, Environmental Impact Appraisal, and the Federal Register Notice are also enclosed.

Sincerely,

Original Signed by
