Clinton, IL 61727

SUBJECT: SENIOR REACTOR OPERATOR LICENSE ELIGIBILITY

Dear Mr. Coyle:

In a letter (U-603403) dated August 23, 2000, you asked the Nuclear Regulatory Commission staff to waive the required six months of responsible power plant experience at Clinton Power Station for two senior reactor operator license examination candidates. We have reviewed the details of this request and have determined that Mr. Daniel M. Hunt and Mr. Patrick J. Giancatarino will each lack approximately four months of required power plant experience at Clinton Power Station at the time the examination will be administered. When you submit license applications for the examination, please request a waiver for the power plant experience requirement for these individuals on their individual applications. Reference this letter on the applications. We will approve the waiver and administer the requested license examination to these two applicants assuming they have met all other Nuclear Regulatory Commission and Clinton Power Station requirements for a senior reactor operator license. Assuming successful completion of the examination, Mr. Hunt's and Mr. Giancatarino's licenses will be withheld until you certify in writing that all requirements to issue the licenses have been met.

If you have any additional questions concerning this matter, please contact Mr. Jay Hopkins at (630) 829-9739 or me at (630) 829-9733.

Sincerely,

/RA/

David E. Hills, Chief
Operations Branch
Division of Reactor Safety

Docket No. 50-461
License No. NPF-62
