Please find attached three Massachusetts Device and Source Registrations files for transfer to the US Nuclear Regulatory Commission. These files are the original files provided by the Commonwealth of Massachusetts Department of Public Health Radiation Control Program. We are in the process of closing the GammaMed USA office in Massachusetts and are therefore requesting transfer of the source and device registration to the US Nuclear Regulatory Commission. We have already terminated the GammaMed USA, Inc. licence for the Massachusetts location. These products are currently listed on MDS Nordion service and distribution licence issued by the US NRC Number 54-28275-01 Amendment 8. A copy of this licence has been attached for your reference.

Two copies of each file have been provided. The copies consist of the original file as provided by the Commonwealth of Massachusetts and a copy of the file.

1. Device Registration number: MA-1056-D-101-S  
Device: GammaMed 12i and GammaMed 12it.
2. Device Registration number: MA-1056-D-103-S  
Device: GammaMed Plus.
3. Source Registration number: MA-1056-S-102-S  
Source: GammaMed 232.

Please note that the GammaMed 12i and 12it were previous registered by the USNRC under the registration number: NR-1056-D-101-S.

The name of the distributor listed on all three registrations should be changed from GammaMed USA Inc to:

MDS Nordion Inc.
