Dear Mr. Arnold:

The Commission has issued the enclosed Amendment No. 59 to Facility Operating License No. DPR-50 for Three Mile Island Nuclear Station, Unit No. 1 (TMI-1). The amendment consists of changes to the Technical Specifications in response to your request dated August 30, 1978 (GQL 1309), and revised by letters dated March 31, 1980 (TLL 143), and June 9, 1980, and staff discussions.

The amendment revises the Technical Specifications for TMI-1 by eliminating the present temporary requirements to perform periodic special inspection of the containment ring girder and allows future inspections of the ring girder to be performed in conjunction with the normal containment structural surveillance. Changes to your proposal, necessary to meet our requirements, have been discussed with and agreed to by your staff.

Copies of the Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Original signed by
