Docket No. 50-289

Metropolitan Edison Company
 ATTN: Mr. J. G. Herbein
 Vice President
 P. O. Box 542
 Reading, Pennsylvania 19603

Gentlemen:

The Commission has issued the enclosed Amendment No. 47 to Facility Operating License No. DPR-50 for the Three Mile Island Nuclear Station, Unit No. 1 (TMI-1). The amendment consists of changes to the Technical Specifications in response to your application dated November 12, 1976, revised January 7, 1977, and supplemented by your letter of July 14, 1978.

This amendment revises the Technical Specifications to add surveillance requirements for steam generator tubes in accordance with your application as revised and supplemented, and discussions with the staff. Our Safety Evaluation relating to this change was previously transmitted to you by our letter of June 27, 1978. Because of certain changes made in the draft of the Technical Specifications since that time, we have prepared a Supplement to the earlier Safety Evaluation.

Copies of the Supplement to the Safety Evaluation and the Notice of Issuance related to the amendment are also enclosed.

Sincerely,

Original signed by
 Robert W. Reid, Chief
 Operating Reactors Branch #4
 Division of Operating Reactors
