

September 22, 1978

Docket No. 50-289

Metropolitan Edison Company
ATTN: Mr. J. G. Herbein
Vice President
Post Office Box 542
Reading, Pennsylvania 19603

Gentlemen:

The Commission has issued the enclosed Amendment No. 45 to Facility Operating License No. DPR-50 for the Three Mile Island Nuclear Station, Unit No. 1 (TMI-1). The amendment consists of changes to the Technical Specifications in response to your application dated June 23, 1978, as supplemented August 7, 1978.

This amendment revises the Technical Specifications to reflect plant operating limitations for operation in Cycle 4. This amendment also deletes paragraph 2.c.(3) from the license. This paragraph, which was added by Amendment No. 40, set forth a license condition applicable to operation during the early portion of Cycle 4. Based on our review of your submittal of June 15, 1978, we conclude that you have satisfied the license condition and that its deletion at this time is appropriate.

Copies of the Safety Evaluation and the Notice of Issuance related to the amendment are also enclosed.

Sincerely,

Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors
