(108)

Item C2.6.1 in Chapter VII of the August Draft of the GALL (Page VII C2-4) identifies an Aging Effect for Lube Oil Coolers. However, there is no program information on the next page (C2-5) as there is for the other items on page C2-4. It appears the last row of the table on page C2-5 related to item C2.6.1 was inadvertently omitted.
