Below is the result of your feedback form. It was submitted by Molly Tan Hayden, M.D. (mgttan@aol.com) on Saturday, October 7, 2000 at 12:29:12

Comments: Nuclear reactors should be decommissioned as scheduled. They must not be allowed to exist beyond their mandatory retirement. It has been well established that people who work in or live near nuclear plants suffer health effects and shortened lives. The NRC people and reactor owners who live safe distances away are still responsible for the health consequences of those citizens. I just learned about the Oct. 16 deadline for public comments. In view of the gravity of this decision, the deadline should be delayed and the issue and new deadline should be widely published in newspapers and on television.
