Re: 20 yr. extension & Oct. 16 deadline

Dear NRC Reps:

Please be informed that giving automatic 20 year license extensions to nuclear power plants in the US is a VERY bad idea. This should definitely not be done.

The Oct. 16 deadline for public comment must be extended. Thank you for your consideration. We understand how important it is for the NRC to hear from concerned citizens and health advocates.

Yours truly,

Rose Marie Williams, pres.
