Subject: Twenty Year extension

I am very opposed to the twenty year extension that has been or may be given to the existing nuclear power plants. These plants should not remain open. Please extend the period of time for comments on this issue. Since the decision seems to have been made behind closed doors, the people do not have sufficient information regarding the repercussions of such a lenience. Please, for the sake of our children and human kind, do what you can to close old nuclear power plants, NOT to help them remain open.

Thank you,
Mona Warner
