Subject: Comments on NRC Operator Licensing

Below is the result of your feedback form. It was submitted by Alan Gleiner (glein4@rev.net) on Friday, October 13, 2000 at 12:21:23

Comments: I am concerned about the lack of public information and lack of public participation in the current process of extending the liscencing of nuclear reactors for another 20 years. Upon what data are we basing their safety and realibility?
Please extend the public input period. This is a public safety issue of a very serious nature and demands extreme vigilance. It should not be taken lightly.
