**Subject:** 20 year extension for nuclear reactors

We object to a 20 year extension of reactor life for 85% of USA's reactors. This is a very dangerous proposal. You will be allowing aging plants to continue operating long past their original life span. All of us will be in danger from additional radioactive pollution to our environment and our health. By your own testimony before congress, you stated that there is a 45% chance of a core meltdown over exactly this period - 20 years. We demand that you put our welfare ahead of the nuclear industry. that is the purpose of you Commission.
