I strongly object to nuclear reactors having their commissions renewed. It is time to stop the use of nuclear power. It has proven to be far too costly, and has especially proven to be the most dangerous polluter of our planet. There is no way to safely dispose of nuclear waste...you can bury it, put it out to sea and try to hide it, but it's always there, and will be for thousands of years. This is not the legacy I wish to leave behind for my family. Please, do not continue the commission of these deadly nuclear power plants. There are many hardworking scientists developing alternative energy sources. This is where our research and development money should be going.
