We are strongly opposed to "GALL" or any other proposal to generically extend operating licenses for aging nuclear reactors. Plans for decommissioning these facilities were put into place for the sake of safety, and extending their licenses to operate for another 20 years is irresponsible and negligent. We must consider the future health of the American people and their surroundings, and adhere to strict guidelines for ending the lives of old reactors and the imminent dangers they pose. Please enter these concerns into the official record of public comment.
Thank you,
Holly E Cooper
