Comments: I think we should continue along the path of phasing out nuclear power plants, and to NOT extend their plant licenses.

Nuclear power tends to be more expensive than many other energy sources.

Nuclear power plant failures/accidents pose a much greater health/environmental hazzard than other forms of power generation (especially renewable energy).

Disposal of nuclear waste is still an unsolved problem, with potential risks for health/environment, as well as large financial costs (which adds to the high cost of nuclear power).
