Subject: Comments on NRC License Renewal

Below is the result of your feedback form. It was submitted by Tom Ferguson (tferguson8@aol.com) on Wednesday, October 4, 2000 at 10:13:29

Comments: to extend the licenses of nuclear reactors is dangerous, by your own (NRC) testimony before Congress, that there's a 45% chance of a core meltdown over exactly this period- 20 years And that by your own commissioned report, while grossly an underestimate, there would be unacceptable numbers of dead, cancers, injuries & economic damage.

We need to pursue alternative, sustainable energy sources and abandon this dangerous nuclear technology which poses an unacceptable risk to us, future generations and the environment. thank you, tom ferguson, Atlanta GA
