Comments: I am writing regarding an application to allow an expected 85 percent of the nation's nuclear reactors to live beyond mandatory retirement.

This is outrageous - and done only, in my opinion, to profit certain individuals and companies. This is short-sighted thinking and taxpayers will again pay in the end both monetarily and through degradation of health.

I request that the NRC provides an EXTENSION of their Monday October 16, 2000 deadline for public comment and publicize this issue - or will this be another example of government doing things behind closed doors because they fear public reaction? We, as citizens living in a democracy, have a right to determine our own future and the existence of future generations.

20 YEAR EXTENSION OF REACTORS AROUND THE USA CANNOT BE ALLOWED TO HAPPEN.
