

November 23, 1992

MEMORANDUM FOR: James M. Taylor
Executive Director for Operations

William C. Parler
General Counsel

FROM: John C. Hoyle, Acting Secretary /s/

SUBJECT: SECY-92-366 - PROPOSED LICENSE, UNDER 10 CFR
PART 72, FOR DRY CONCRETE MODULE STORAGE OF
SPENT FUEL AT BALTIMORE GAS AND ELECTRIC
COMPANY'S CALVERT CLIFFS NUCLEAR POWER PLANT
SITE

The Commission (with all Commissioners agreeing) has approved the issuance of a license to Baltimore Gas and Electric Company under 10 CFR Part 72 to receive, transfer, and store spent fuel in an independent spent fuel storage installation on the Calvert Cliffs Nuclear Power Plant site.

In addition, the Commission requests that the Office of the General Counsel consider rulemaking to eliminate any requirement for Commission authorization prior to the NRC staff issuance of specific licenses under 10 CFR Part 72 for independent spent fuel storage installations, including specifically the requirement for such authorization contained in 10 CFR 2.764(c) and also mentioned in 10 CFR 72.46(d). Avoiding unnecessary Commission review will ease the burdens of both the staff and the Commission, and reduce fees charged to license applicants.
