Subject: Revised Implementation Date Associated with the
Credit for Soluble Boron in Spent Fuel Pool
Rochester Gas and Electric Corporation
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Reference: (a) Letter from Robert C. Mecreddy (RG&E) to Guy S. Vissing (NRC), "Application for Amendment to Facility Operating License Credit for Soluble Boron in Spent Fuel Pool", dated March 8, 2000.

Dear Mr. Vissing:

In Reference (a), RG&E submitted a proposed change to the Improved Technical Specifications associated with the spent fuel pool storage requirements, and within the cover letter we requested that upon approval that the amendment be implemented within 30 days. Implementation of the new Technical Specification requirements will require a significant number of fuel assembly movements in the spent fuel pool. As such, we would like to request that the approval letter state "and shall be implemented prior to June 30, 2001", which is the current end date specified in Technical Specification 4.3.1.1.b for the use of interim compensatory measures.

Very truly yours,

Robert C. Mecreddy
Vice President
Nuclear Operations Group
