

11/16(17)/00 *Public Meeting*

Location: Nuclear Regulatory Commission  
11545 Rockville Pike  
Two White Flint North  
Conference Room T-10A1  
Rockville, Maryland 20852

Time: 8:30 a.m. - 5:00 p.m.

Subject: A one- or two-day public working-level meeting for NRC staff, owner's groups and other interested stakeholders to exchange more detailed information regarding potential changes to loss of coolant accident (LOCA)-related regulatory requirements, as part of the staff's efforts to risk inform the regulatory requirements of 10 CFR Part 50 (Option 3). Some of the topics to be discussed at the meeting include the following:

- Westinghouse Owner's Group Analyses in Support of Large Break LOCA (LBLOCA) Redefinition
- Risk-Impact of LBLOCA Redefinition
- Potential Benefits (e.g., Safety) of LBLOCA Redefinition
- Impact of LBLOCA Redefinition on Implementing Documents & Safety Issues
- LOCA-Related Risk Data and Insights
- Other ECCS-Performance Options
- Option 3 - Future Activities

Anyone planning to attend the workshop is kindly requested to contact Alan Kuritzky (see below).
