Subject: radioactive soil must be isolated

Dear Tom Nicholson,

I am very disturbed that the Nuclear Regulatory Commission may allow radioactive soil to be "recycled" and introduced into daily commerce. There is already so much pollution in our environment. Adding radioactive soil, no matter how little, would degrade ecosystems further and put the public at increased risk of cancer. Radioactive soils should NOT BE RELEASED or recycled in any way--they should be isolated from the public and the environment.

Sincerely,

Deborah L. Bors
