Dear NRC:

Your goals should include 1. protecting the American people from radioactive contamination not endangering people's health and safety and poisoning millions of American men, women and children and 2. to isolate radioactive materials and prevent exposures, not to deliberately expose people to radioactive waste by allowing radioactive materials into regular daily commerce. If soil, metals, and equipment from decommissioned power plants are contaminated from radioactive materials, nuclear power and the fuel chain, then they have no business being circulated and should be treated as a waste and isolated from the public.

Sincerely,

Celia Sue Hecht
