Subject: Using low level radioactive soils

65 FR 44843

7-19-00

(67)

I am opposed to your controversial plan which would allow nuclear power plant operators to market their radiologically contaminated soils to construction companies, farmers, golf courses and other commercial entities.

Low level radioactive waste must be isolated and treated as toxic waste. It must be kept out of the environment and away from our children.

=====

A man was found sitting in the middle of the desert in a contraption made of rocks, bits of lumber, and old, blown tires, which he was busily "steering" as if it were actually a vehicle in motion. Asked what he was doing, the man said, "Driving home." "You're never going to get there in this," he was told. He said, "If not in this, then in what?" From Beyond Civilization, a book by Ishmael author Daniel Quinn
