Subject: stop the maddness

Dear Sirs,

I have just finished reading the rediculous plan to sell radioactive soil from nuclear plants for use in farming, homes, school yards, etc. Before doing something so ignorant to society; perhaps you should consider taking your children and granchildren out to the nuclear site and playing with them in the soil for a few years and please do grow your vegetables and raise your cows, pigs and chickens there as well. After consuming the food and living there for a few years, if you and your loved ones remain healthy, then maybe you can decide if it is o.k. for us!

Stop the Maddness!!

Julia Williams
