To the U.S. Nuclear Regulatory Commission,

Have you **all** lost your minds? It is hard to fathom that this is **even** up for consideration. "IF" you are seriously contemplating this unthinkable action, I suggest that **you** take this contaminated soil home, put it in your back yards, grow your fruits and vegetables in it, let your livestock and poultry graze on it. Watch **YOUR** kids, family and loved ones inhale it, eat it, absorb it through their skin and by all means let them play in it. If, after several years you or any of your loved ones are not experiencing **any** chemically induced illnesses, rare cancers, tumors, neurological or respiratory problems then run it by us again.

HOWEVER, you let us make the final, informed decision as to what we expose our families and ourselves to. **Many of us have already lost way too much to unwarranted toxic chemical exposures!**

Sincerely, Peggy Troiano
