Subject: comments on reuse plan

To Whom It May Concern:

I am writing to state my opposition and outrage to any planned soil "reuse" program with soil contaminated with nuclear waste. The concept that radioactive soil would be deliberately used in a variety of construction and landscaping plans on public or private property (including playgrounds for children) speaks of a complete and despicable disregard of the rights of others. To imply by its planned uses that certain ethnic/social groups will be most affected as recipients of this "plan" (i.e. adobe brick in New Mexico) can only be considered murderous and callous inhumanity.

Please do not let the mentality of "We're in the soil business, remember!" bring the unimaginable grief and despair that would be associated with the reuse and spreading of soil contaminated with nuclear waste.

Please inform me continuously by email or regular mail of the status of this plan for reuse of radioactive soil. I will be forwarding documents I have received relating to this outrageous proposal, and a copy of this letter, to my representatives.

Thank you very much.
