I wish you could skip the first 3 sections of "filler" information, and get to the meet of the topic. It scares me that people are considering reusing radioactive material near peoples homes, recreation areas and the like. We always learn 10 to 20 years later that "oops, that was a mistake, gee we didn't have all the information we needed to make an intelligent decision, and woe to the poor people with weaked immune systems who inhale or otherwise are unintentially exposed." Please do some extra research!!!!!!!!!!!!!!!!!!!!!! And be extremely careful. Thanks, Beth Stokes
