Comments: To whom it may concern,

I am writing to express my concern over proposals to reuse radioactive soil. I feel this is an irresponsible and short-sighted approach to cleaning up reactor sites that seriously jeopardizes public health.

My knowledge about this particular issue is admittedly slight, but I have researched the construction of a nuclear waste repository at Yucca Mountain extensively, and am therefore familiar with the approach to radioactive cleanup that industry and government officials are adopting. Citizens like myself will no longer tolerate temporary and profit-minded solutions to waste issues that the soil relocation idea represents.

I am sure that NRC officials would not want to raise their families in homes glowing from radioactive bricks. We, as a population, are unsure of the effects such practices will bring about, and, I am not willing to meddle in such unpredictabilities when dealing with such permanently mutative materials as contaminated soils.

Sincerely,
Greg Reed
