NRC Docket Nos. 50-454 and 50-455

Subject: Byron Station Security Plan, Revision 57

In accordance with 10 CFR 50.54(p)(2), "Conditions of licenses," we are submitting a change to the Commonwealth Edison (ComEd) Company Byron Station Security Plan. In accordance with 10 CFR 50.4(b)(4), "Security plan and related submittals," attached are the original and three (3) copies of Revision 57.

Revision 57 includes the following change.

The Security Plan has been revised to remove an exterior hatch as a portal leading to a Vital Area. This hatch has been permanently sealed with material of sufficient strength to meet the performance requirements of 10 CFR 73.55(a), "General performance objective and requirements."

As required by 10 CFR 50.54(p)(2), we have concluded that this change does not decrease the safeguards effectiveness of the Byron Station Security Plan.

The change to the Byron Station Security Plan was implemented on September 13, 2000. In accordance with 10 CFR 50.54(p)(2), this change shall be reported within 60 days of implementation, i.e., November 12, 2000.

Attachment 2 contains Safeguards Information that must be protected from public disclosure as required by 10 CFR 73.21, "Requirements for the protection of safeguards information."
