Phil:

I'm asking Tom O'Brien to get back to you with an answer to your question.

Thanks

Paul

Paul,

Richard Ratliff asked that I contact you regarding a financial assurance issue. The issue pertains to licensees who must provide a decommissioning funding plan, which includes a decommissioning cost estimate [as opposed to using the prescribed dollar amounts in 10 CFR 30.35(d)]. We would like to know if the NRC requires that the cost estimate be based on the radionuclides (and amount) routinely possessed by the licensee, or on the radionuclides and the amount of each authorized on the license?

If I did not make my question clear, please let me know. I can also be contacted by telephone at (512) 834-6688, extension 2210. thanks for your time.

Phil
