Comments: Sirs,

I am deeply disturbed to hear of the plans to sell radioactive soil. I feel that this is a dangerous practice. From the many books and articles that I have read, I have come to the conclusion that there is no safe level of radiation. No one is taking into account the effects that the levels of radiation may have on people. I find it especially appalling that plans are being made to use radioactive soil in the making of bricks and other items used in the building of homes. For the sake of our children, and of future generations, I beg the NRC to please reconsider these plans.

Sincerely yours,
Anita Cameron
