SUBJECT: DELETION OF BEAVER VALLEY POWER STATION, UNIT NO. 1 LICENSE  
CONDITION 2.C.(4)

Dear Mr. Cross:

By letter dated January 25, 1980, the NRC issued License Amendment No. 24 to Beaver Valley Power Station, Unit No. 1. That amendment deleted the requirements of license condition 2.C.(4) which had been issued as part of the original license (Facility Operating License No. DPR-66). However, License Amendment No. 24 did not include a revised page to show the deletion of this license condition. We have prepared a revision to page 4 of Facility Operating License No. DPR-66 to reflect the deletion of license condition 2.C.(4) and a copy is enclosed for your use.

We apologize for any inconvenience this may have caused. Please contact me at (301) 415-1409 if you have any questions regarding this issue.

Sincerely,

Donald S. Brinkman, Senior Project Manager  
Project Directorate I-2  
Division of Reactor Projects - I/II

SUBJECT: DELETION OF BEAVER VALLEY POWER STATION, UNIT NO. 1 LICENSE  
CONDITION 2.C.(4)

Dear Mr. Cross:

The Beaver Valley Power Station, Unit No. 1 (BVPS-1) license (Facility Operating License No. DPR-66) contains license condition 2.C.(4) regarding steam generator water rise rate. On February 29, 1980, the Commission gave notice that it had deleted this license condition with the issuance of License Amendment No. 24 to the BVPS-1 license (45 FR 13566). However, License Amendment No. 24 did not include a revised page to show the deletion of this license condition. We have prepared a revision to page 4 of Facility Operating License No. DPR-66 to reflect the deletion of license condition 2.C.(4) and a copy is enclosed for your use.

We apologize for any inconvenience this may have caused. Please contact me at (301) 415-1409 if you have any questions regarding this issue.

Sincerely,

A handwritten signature in cursive script that reads "Donald S. Brinkman".

(3) Less Than Three Loop Operation

Duquesne Light Company shall not operate the reactor at power levels above P-7 (as defined in Table 3.3-1 of Specification 3.3.1.1 of the Technical Specifications, Appendix A) with less than three (3) reactor coolant loops in operation until safety analyses for less than three loop operation have been submitted by the licensees and approval for less than three loop operation at power levels above P-7 has been granted by the Commission by amendment of this license.

(4) Steam Generator Water Rise Rate

Deleted per License Amendment No. 24.

(5) Fire Protection Program

The license shall implement and maintain in effect all provisions of the approved fire protection program as described in the Updated Final Safety Analysis Report (UFSAR) for the facility, subject to the following provision: the licensee may make changes to the approved fire protection program without prior approval of the Commission only if those changes would not adversely affect the ability to achieve and maintain safe shutdown in the event of a fire.

Amendment No. 8, 10, 13, 18, 26, 32, 39, 136,  
Corrected by letter dated
