Gentlemen:

In the Matter of) Docket No.50-390
Tennessee Valley Authority)

**WATTS BAR NUCLEAR PLANT (WBN) UNIT 1 - PROPOSED OPERATING LICENSE
AMENDMENT NPF-90 - PHYSICAL SECURITY/CONTINGENCY PLAN - TAMPER
SWITCH/LINE SUPERVISION ALARMS TESTING FREQUENCY**

The purpose of this letter is to revise the proposed change to the physical security plan which was previously submitted in the License Amendment Request dated March 10, 2000. These changes are the result of teleconference calls with the NRC Security Reviewer A. Tardiff, on October 26 and October 31, 2000. TVA has evaluated these changes and has determined that they do not effect the No Significant Hazards evaluation which was submitted in the March 10, 2000 letter.

TVA requests this submittal be withheld from public disclosure under 10 CFR 2.790(d)(1) as the information enclosed is part of a safeguards document. If you have any questions about this change, please contact me at (423) 365-1824.

Sincerely,

P. L. Pace
Manager, Site Licensing
and Industry Affairs
